

## Column Field Definitions

- STOPID – Unique identifier given to each bus stop on the network; for the Better Bus Network, stops that are coded “99999” for the time being do not currently have a STOPID assigned to them
- Stop Name – Bus stop name as coded in the data for the network
- Route\_# – These fields identify the route number and frequency that serves a unique bus stop on the network; if a stop has the rows populated for these fields, that means that the stop has those routes serving it

Better Bus Network Stops Peak Hour Frequencies
